U-101-16

SUBJECT: Notification of Annual Review and Update of Integrated Natural Resources Management Plan (2013 – 2018), U.S. Army Camp Stanley Storage Activity, Boerne, Bexar County, Texas

Russell Hooten, Wildlife Habitat Assessment Program
Texas Parks and Wildlife Department, Wildlife Division
6300 Ocean Drive, NRC 2501, Unit 5846
Corpus Christi, Texas 78412

Dear Mr. Hooten:

Camp Stanley Storage Activity has initiated the review and update process for its Integrated Natural Resources Management Plan (INRMP) and requests that the Texas Parks and Wildlife Department assist with timely review and coordination of the draft update. The current INRMP covers the planning period 2013 through 2018 and was approved by the Texas Parks and Wildlife Department Executive Director on April 15, 2013.

The INRMP review and update will be accomplished in accordance with the Sikes Act, as amended (16 U.S.C. 670a-670f); the *Memorandum of Understanding (MOU) between the U.S. Department of Defense, U.S. Fish and Wildlife Service, and the Association of Fish and Wildlife Management Agencies for a Cooperative Integrated Natural Resource Management Program on Military Installations* (July 29, 2013); and the *Mutual Department of Defense and U.S. Fish and Wildlife Service Guidelines for Streamlined Review of Integrated Natural Resources Management Plan Updates* (July 20, 2015, http://www.dodnaturalresources.net/Streamlined_Sikes_guidance_and_memo_-_signed_7-20-15.pdf). The MOU defines an INRMP update as "Any change to an INRMP that, if implemented, is not expected to result in consequences materially different from those in the existing INRMP and analyzed in an existing National Environmental Policy Act document. Such changes will not result in a significant environmental impact, and installations are not required to invite the public to review or to comment on the decision to continue implementing the updated INRMP."

We currently anticipate submitting the draft INRMP update for review in late October 2016. As outlined in the *Guidelines for Streamlined INRMP Review*, the update will clearly describe the scope and location of all proposed changes table or matrix format, and the changes themselves will be captured in the INRMP using the track changes function to facilitate review. The *Guidelines for Streamlined INRMP Review* include additional details about the review and concurrence process, and associated timeframes.

Thank you in advance for your cooperation and assistance on this project. Please contact Felicia Kraintz, Environmental Program Manager, at 210-295-7067 or kraintzf@cssamma.com if your office has any questions or additional input regarding the INRMP update process.

Sincerely,

Jason D. Shirley
Installation Manager
