Re: Area of Concern (AOC) 56 - Approval of Closure Report;
Camp Stanley Storage Activity, Boerne, TX;
TCEQ SWR No. 69026

Dear LTC Shirley:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the report entitled *Final Area of Concern 56 Closure Report* dated June 2004. The report was submitted with your letter dated June 16th and received by the TCEQ on June 24, 2004. The report indicated that closure activities have been completed according to the TCEQ Risk Reduction Standard (RRS) No. 1 pursuant to Title 30 Texas Administrative Code (TAC) Chapter 335 Subchapters A and S.

In order to attain RRS No. 1, all industrial solid waste and municipal hazardous waste and waste residues must be removed or decontaminated from affected media (i.e., soil, surface water, groundwater, air) to naturally occurring background levels or the Practical Quantitation Limits (PQL), provided that the person demonstrates that lower quantitation limits are not possible when PQLs are greater than background.

The TCEQ has completed a review of the final report. Based on the information contained in the report, it appears that closure of AOC-56 attained RRS No. 1. AOC-56 is released from deed recordation and post-closure care requirements.

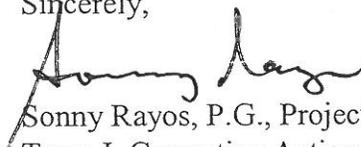

Please be aware that it is the continuing obligation of persons associated with a site to ensure that municipal hazardous waste and industrial solid waste are managed in a manner which does not cause the discharge or imminent threat of discharge of waste into or adjacent to waters in the state, a nuisance, or the endangerment of the public health and welfare as required by 30 TAC §335.4. If the actual closure fails to comply with these requirements, the burden remains upon Camp Stanley Storage Activity to take any necessary and authorized action to correct such conditions.

LTC Stanley
