Subject: Final Solid Waste Management Unit B-3 Construction Report,
Camp Stanley Storage Activity, Boerne, Texas

Dear Mr. Smith:

The Camp Stanley Storage Activity (CSSA), McAlester Army Ammunition Plant, U.S. Army Field Support Command, Army Materiel Command, U.S. Army, is submitting the Solid Waste Management Unit (SWMU) B-3 Construction Report for the pilot study remedial effort performed. The construction report is to document the design and construction for planned injection of recovered groundwater authorized by Class V Aquifer Remediation Injection Well, which was submitted to the Texas Commission on Environmental Quality (TCEQ) in May 2006. The permit application was approved July 20, 2006 and TCEQ Authorization Number 5X2600431; WWC 12002216; CN602728206/RN104431655 was assigned to the SWMU B-3 injection system. An amendment to CSSA's Class V Aquifer Remediation Injection permit was submitted November 26, 2006 to authorize the use of a sixth trench that was encountered during removal actions at SWMU B-3. CSSA requests concurrence from the TCEQ so we can initiate the injection of recovered groundwater and use of the sixth trench located within SWMU B-3.

If you have any questions or concerns, please feel free to contact, Glaré Sanchez, CSSA Environmental Program Manager, at (210) 698-5208.

Sincerely,

Jason D. Shirley
Installation Manager
