Attention: LTC Jason D. Shirley, Installation Manager

Re: Area of Concern (AOC) 55 – Approval  
Camp Stanley Storage Activity (CSSA), Boerne, TX  
TCEQ Solid Waste Registration No. 69026  
EPA ID No. TX2210020739

Dear LTC Shirley:

The Texas Commission on Environmental Quality (TCEQ) has reviewed your letter dated May 15, 2008. Your letter responds to the TCEQ letter dated February 28, 2008, which requests additional information regarding the management of incinerator ash that was discovered at AOC-55. According to your letter, the incinerator ash was characterized according to 30 Texas Administrative Code Chapter 335 Subchapter R and subsequently disposed of at Waste Management Inc. - Covel Garden Facility. As indicated further, all laboratory results are available for perusal in the section pertaining to AOC-55, Appendix A of Camp Stanley Storage Activity Environmental Encyclopedia.

On the basis of available information pertaining to AOC-55; the TCEQ approves closure of AOC-55. Additionally, it appears that remediation activities have been completed in accordance with the TCEQ Risk Reduction Standard (RRS) No. 1 pursuant to Title 30 Texas Administrative Code (TAC) Chapter 335 Subchapters A and S. Therefore, deed notice and post-closure care are not required. No further closure or corrective action under Chapter 335 is required for this unit/area.

In order to attain RRS No. 1, all industrial solid waste and municipal hazardous waste and waste residues must be removed or decontaminated from affected media (i.e., soil, surface water, groundwater, air) to naturally occurring background levels or the Practical Quantitation Limits (PQL), provided that the person demonstrates that lower quantitation limits are not possible when PQLs are greater than background.

Please be aware that it is the continuing obligation of persons associated with a site to ensure that municipal hazardous waste and industrial solid waste are managed in a manner which does not cause the discharge or imminent threat of discharge of waste into or adjacent to waters in the

State, a nuisance, or the endangerment of the public health and welfare as required by 30 TAC §335.4. If the response actions described in the report fail to comply with these requirements, Camp Stanley Storage Activity must take any necessary and authorized action to correct such conditions. A TCEQ field inspector may conduct an inspection of the site to determine compliance with the report.

Questions concerning this letter should be directed to my attention at 512.239.2371 or via email at [srayos@tceq.state.tx.us](mailto:srayos@tceq.state.tx.us). When responding by mail, please submit an original and one copy of all correspondence and reports to the TCEQ Remediation Division at Mail Code MC-127. An additional copy should be submitted to the local TCEQ Region Office. The information in the reference block should be included in all submittals. Thank you for your continued cooperation.

Sincerely,

Sonny Rayos, P.G., Project Manager  
Team 3, Environmental Cleanup II  
Remediation Division  
Texas Commission on Environmental Quality
