Dear LTC Shirley:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the report entitled *Release Investigation Report* Area of Concern (AOC) - 69 dated June, 2009. The report indicated that AOC-69 was used for disposal and burning of wooden crates as indicated by nails, hinges, cleaning kits e.g., wire brushes. Following excavation, removal, disposal and remediation of debris, soil verification samples were collected. The final confirmation results showed no chemicals of concern at the site. Remediation was completed according to the TCEQ guidance: *Determining Which Releases are Subject to TRRP*. Following completion of remediation activities, CSSA requests a "No Further Action" for AOC 69.

The TCEQ has reviewed the AOC-69 remediation report. On the basis of information contained in the report, the TCEQ accepts the remediation and closure of AOC – 69; no additional remediation is required for this unit.

Please be aware that it is the continuing obligation of persons associated with a site to ensure that municipal hazardous waste and industrial solid waste are managed in a manner which does not cause the discharge or imminent threat of discharge of waste into or adjacent to waters in the state, a nuisance, or the endangerment of the public health and welfare as required by 30 Texas Administrative Code (TAC) §335.4. If the activities described in the report fail to comply with these requirements, Camp Stanley Storage Activity shall take necessary and authorized action to correct such conditions.
