Re: On-Post and Off-Post Monitoring Reports dated August 2006 - Approval
Camp Stanley Storage Activity (CSSA), Boerne, TX
EPA ID No. TX2210020739 and TCEQ Solid Waste Registration No. 69026

Dear LTC Shirley:

The Texas Commission on Environmental Quality (TCEQ) received the reports entitled *Final March 2006 On-Post and Off-Post Quarterly Groundwater Monitoring Reports*, dated August 2006. The reports were received by the TCEQ on August 7, 2006. The reports included laboratory analytical results collected from on-post and off-post drinking water and monitoring wells during the March 2006 sampling events.

The on-post report described the results of the facility-wide groundwater monitoring. The off-post report specified the collection of groundwater and drinking water samples from off-site wells collected at following areas: Fair Oaks, Hidden Springs Estates, I-10, Jackson Woods Subdivision, Leon Springs Villa area, Old Fredericksburg Road and Ralph Fair Road. Of the 33 wells sampled off-site, RFR-10 is the only well that contained PCE greater than the Maximum Concentration Levels. This concentration is 6.3 ppb.

The TCEQ has completed its review of the reports. Both reports indicate the pronounced effect of drought on water elevations. The TCEQ requests that the annual report to be submitted to the TCEQ should incorporate any observations and conclusions regarding the effect of the drought on the concentration of contaminants before, during and potentially after the drought (if applicable). This aside, the on-post and off-post quarterly monitoring reports are approved.

Please contact me at 512.239.2371 or at srayos@tceq.state.tx.us if you wish to discuss or if you have questions concerning this letter.

Sincerely,

A handwritten signature in black ink, appearing to read "Sonny Rayos".
