Dear Mr. Shirley:

The Texas Commission on Environmental Quality (TCEQ) has completed the review of the above mentioned report. AOC-45 is approximately 0.5 acre in size and is believed to have been a small arms ammunition disposal area until the 1960s. Approximately 1,000 cubic yards of soil media were excavated and removed and confirmation samples were taken. Confirmation sampling revealed lead concentrations above the Tier 1 protective concentration levels (PCLs); therefore, additional excavation was conducted. The second round of confirmation sampling showed no constituents of concern (COCs) above the Tier 1 Residential PCLs.

CSSA requests no further action for AOC 45 based on the TCEQ guidance: *Determining Which Releases are Subject to TRRP*. Based on the information contained in the report, the TCEQ accepts the no further action for AOC 45.

Questions concerning this letter should be directed to my attention at 512.239-2572 or via email at kcoulter@tceq.state.tx.us. Thank you for your continued cooperation.

Sincerely,
