SUBJECT: Sampling of Water Well JW-15, Located at 7767 Mountain Trail

Dear ██████████

Camp Stanley Storage Activity (CSSA) collected a groundwater sample from your well (JW-15) on 6/6/14. This sample was submitted to a laboratory contracted by CSSA's environmental contractor for volatile organic compound (VOC) analysis. This letter provides you with the VOC data from the laboratory results and a formal thank you for your assistance in this groundwater monitoring effort.

Based on the analytical data, no VOCs related to CSSA's groundwater investigation were identified in the water sample from your well. Results from the laboratory analysis are provided as an attachment for the above sampling event.

As part of the ongoing CSSA environmental program, we are continuing to investigate and cleanup VOC source areas on the installation and to track these compounds in groundwater on- and off-post. As part of this effort, your well is scheduled to be sampled again in March 2015.

In response to your question to the sampling crew on June 6, 2014 we have attached the map from the 2013 Annual Groundwater Fact Sheet with an arrow added to help you locate your well. Your well JW-15 had no VOC detections.

Again, we would like to thank you for your cooperation. We remain committed to making sure your water is safe to use and keeping you informed. If you have any questions concerning this letter, please contact Gabriel Moreno-Fergusson, Environmental Program Manager, at (210) 295-7014.

Sincerely,

  
Jason D. Shirley  
Installation Manager

Ms. Julie Burdey, Parsons

**Qualifiers for laboratory data report:**

U - The analyte was analyzed for, but not detected. The associated numerical value is at or below the laboratory method detection limit (MDL).

F - Indicates the value is above the laboratory method detection limit (MDL), but below the laboratory reporting limit (RL) for the compound.

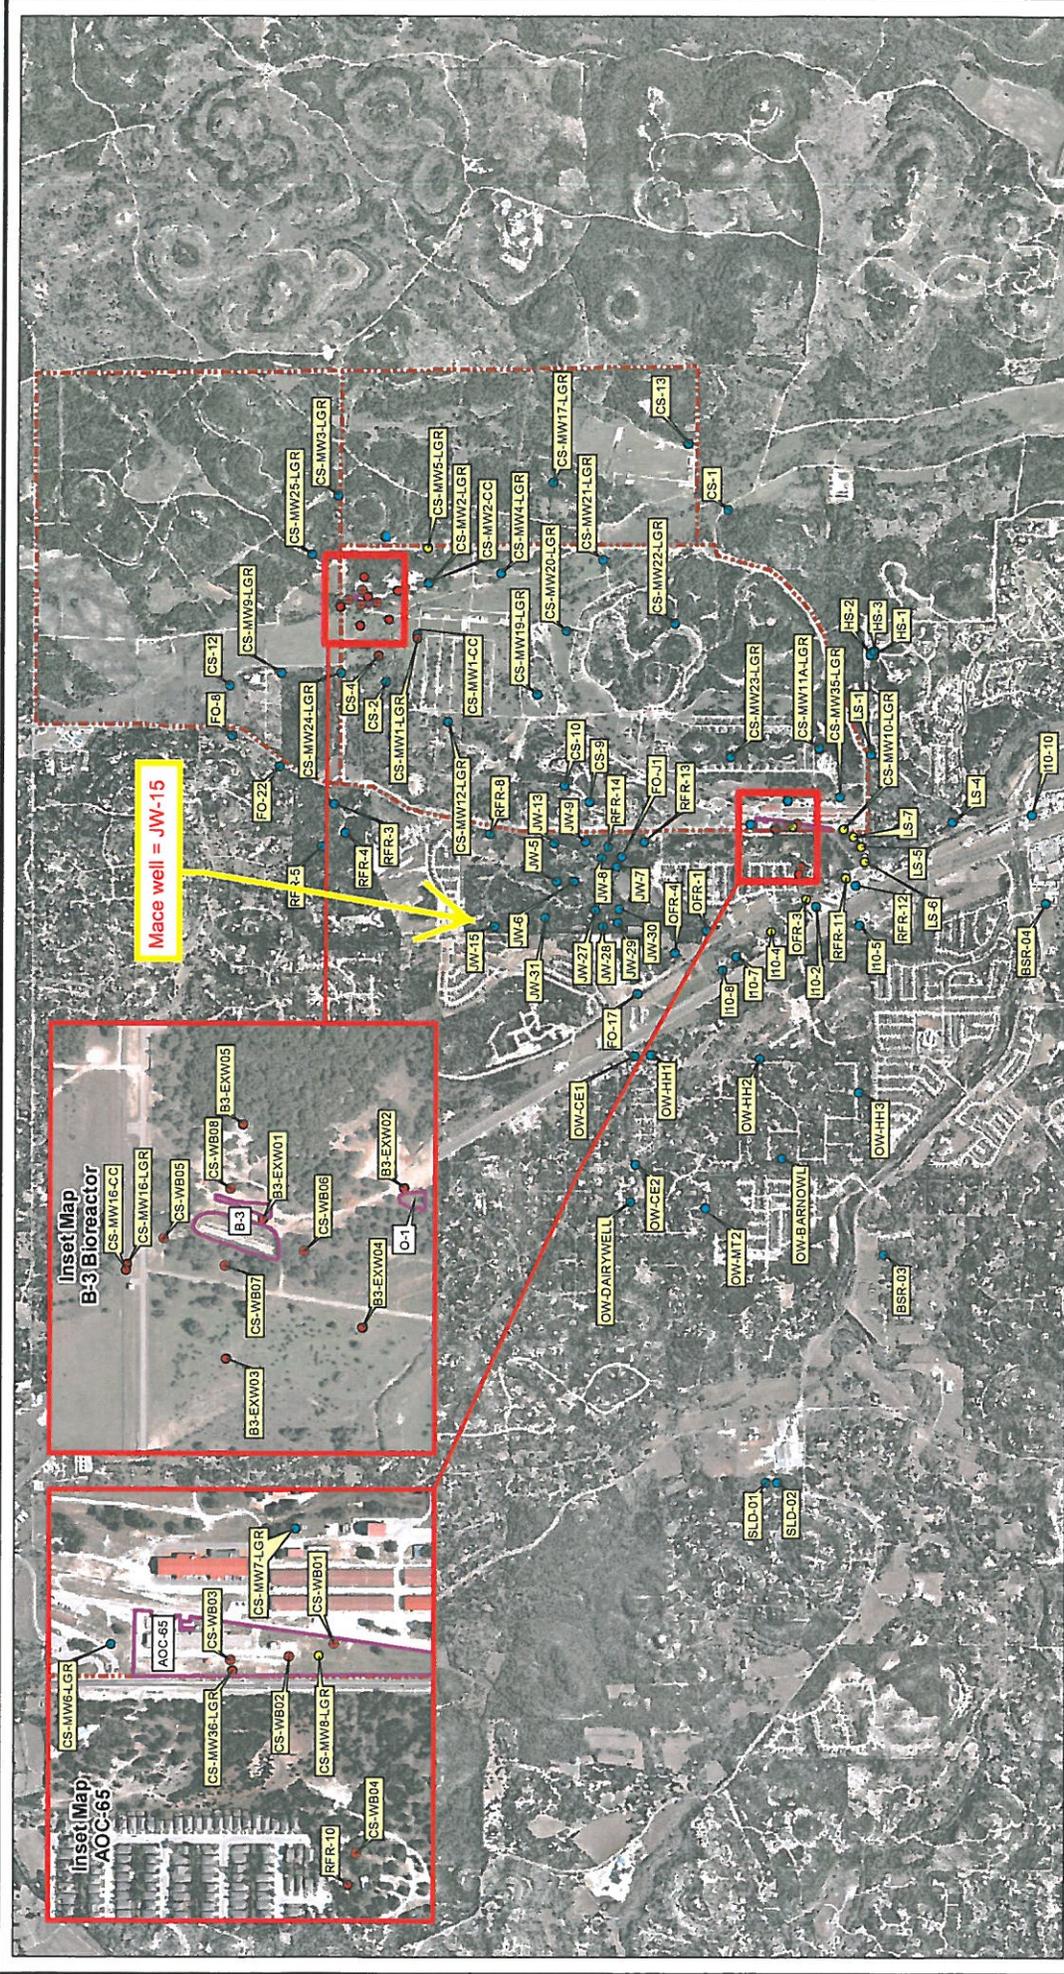

**Abbreviations:**

MDL – method detection limit

RL – reporting limit

DCE – Dichloroethene

TCE – Trichloroethene

Aerial Photo Date: 2013

- Environmental Site
  - Fence Line
  - ⊕ Multi-port Westbay Wells
  - Wells with VOC concentrations > MCL
  - Wells with VOC concentrations between RL and MCL
  - Wells with no VOC concentrations > RL
- MCL = maximum contaminant level  
 RL = laboratory analytical reporting limit
