Re: Camp Stanley Storage Activity (CSSA), Boerne, TX;
TCEQ SWR No. 69026;
Off-Post Quarterly Groundwater Monitoring Report - Request for Additional Information

Dear Mr. Murphy:

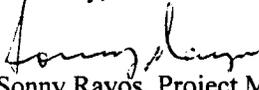

The Texas Commission on Environmental Quality (TCEQ) has received the report entitled *Final December 2002 Off-Post Quarterly Groundwater Monitoring Report* on April 8, 2003.

The report specifies that it fulfills the groundwater quarterly reporting requirements of CSSA's Data Quality Objectives. The TCEQ has reviewed the report. The report consisted of groundwater analytical results for the off-post monitoring of the drinking water wells at Fair Oaks, Jackson Woods, Leon Springs Villa and Hidden Springs Estates Subdivisions. This review has identified that only Volatile Organic Chemicals (VOCs) are being monitored off-post. The TCEQ requests additional information concerning this analytical program. In particular, please explain the reason(s) and justification(s) why laboratory analyses are limited only to VOCs and/or reason(s) and justification(s) why RCRA Eight metals were excluded from the analyses of drinking water at these off-post monitoring locations.

Please submit an original and one copy of the written response to the TCEQ at the letterhead address using mail code number MC-127. An additional copy should be submitted to the TCEQ Region 13 Office in San Antonio. Your response must be received on or before September 30, 2003. The facility name, location and identification number(s) in the TCEQ reference line above should be included in your response.

Please call me at 512.239-2371 or email me at sravos@tceq.state.tx.us if you wish to discuss or if you have questions concerning this letter.

Sincerely,

Sonny Rayos, Project Manager
Team I, Corrective Action Section
Remediation Division
