TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

January 7, 2004

LTC Jason D. Shirley
Installation Manager
Camp Stanley Storage Activity
25800 Ralph Fair Road
Boerne, TX 78015-4800

Re: Camp Stanley Storage Activity, Boerne, TX;
TCEQ SWR No. 69026;
Letters dated October 16 and 21, 2003 regarding closure of SWMU B-10 - Approval

Dear LTC Shirley:

The Texas Commission on Environmental Quality (TCEQ) has received your letter dated October 16, 2003 written in response to the TCEQ letter dated August 20, 2003. The August 20, 2003 TCEQ letter requested additional information concerning closure of Solid Waste Management Unit (SWMU) B-10. The TCEQ also received a letter from Ms. Julie Burdey, Parsons Engineering, dated October 21, 2003 which enclosed the laboratory analytical reports associated with the SWMU B-10 closure. These letters provided additional information to justify a closure of SWMU B-10 according to the Risk Reduction Standard (RRS) No. 1. The original report entitled *Final Solid Waste Management Unit B-10 RCRA Facility Investigation Report* dated May 2003 indicated that closure of SWMU B-10 was conducted according to RRS No. 1 pursuant to Title 30 Texas Administrative Code (TAC) Chapter 335 Subchapters A and S.

In order to attain RRS No. 1, all industrial solid waste and municipal hazardous waste and waste residues must be removed or decontaminated from affected media (i.e., soil, surface water, groundwater, air) to naturally occurring background levels or the Practical Quantitation Limits (PQL), provided that the person demonstrates that lower quantitation limits are not possible when PQLs are greater than background.

The TCEQ has completed a review of the original report and the above-mentioned letters. Based on the information contained in the final report and subsequent letters, it appears that cleanup at SWMU B-10 has attained RRS No. 1. SWMU B-10 is released from deed recordation and post-closure care requirements.

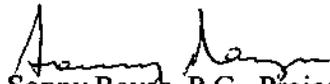

LTC Shirley

Please be aware that it is the continuing obligation of persons associated with a site to ensure that municipal hazardous waste and industrial solid waste are managed in a manner which does not cause the discharge or imminent threat of discharge of waste into or adjacent to waters in the state, a nuisance, or the endangerment of the public health and welfare as required by 30 TAC §335.4. If actual closure fails to comply with these requirements, the burden remains upon Camp Stanley Storage Activity to take any necessary and authorized action to correct such conditions.

A TCEQ Region 13 San Antonio field inspector may review the final closure report for SWMUB-10 and conduct a closure inspection of the site.

Questions concerning this letter should be directed to my attention at (512) 239-2371 or email me at srayos@tceq.state.tx.us. When responding by mail, please submit an original and one copy of all correspondence and reports to the Corrective Action Section at Mail Code MC-127 with an additional copy submitted to the TCEQ Region 13 Office in San Antonio. The TCEQ Solid Waste Registration No. 69026 should be referenced in all submittals.

Sincerely,

Sonny Rayos, P.G., Project Manager
Team I, Corrective Action Section
Remediation Division
Texas Commission on Environmental Quality
