Re: Closure of Area of Concern No. 73 – Approval
Camp Stanley Storage Activity (CSSA), Boerne, TX
TCEQ Solid Waste Registration No. 69026
EPA ID No. TX2210020739

Dear LTC Shirley:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the report entitled *Release Investigation Report* Area of Concern (AOC) - 73 dated September, 2008. The report indicated that AOC-73 was used by the former landowner for disposal of general household trash, metal and lumber debris. Following excavation, removal, disposal and remediation of general household trash, soil verification samples were collected. The analytical results showed no chemicals of concern at the site. CSSA requests that a "No Further Action" is required for AOC 73. On the basis of information contained in the report, the TCEQ accepts the remediation and closure of AOC – 73; no additional remediation is required for this unit.

Please be aware that it is the continuing obligation of persons associated with a site to ensure that municipal hazardous waste and industrial solid waste are managed in a manner which does not cause the discharge or imminent threat of discharge of waste into or adjacent to waters in the state, a nuisance, or the endangerment of the public health and welfare as required by 30 Texas Administrative Code (TAC) §335.4. If the activities described in the report fail to comply with these requirements, Camp Stanley Storage Activity shall take necessary and authorized action to correct such conditions. A TCEQ field inspector may conduct an inspection of the site to determine compliance with the report.

Questions concerning this letter should be directed to my attention at 512.239.2371 or via email at srayos@tceq.state.tx.us. Thank you for your continued cooperation.

Sincerely,
