Re: Approval - Release Investigation Report: Area of Concern (AOC) 75  
Camp Stanley Storage Activity (CSSA), Boerne, TX  
TCEQ Solid Waste Registration (SWR) No. 69026; RN 100662840; CN 602728206  
EPA ID No. TX2210020739

Dear Mr. Moreno-Fergusson:

The Texas Commission on Environmental Quality (TCEQ) has completed the review of the above mentioned report. AOC-75 has a total area of approximately 1.2 acres. Constituents of concern (COCs) at the site include barium, cadmium, lead, and mercury. Soils that were found to exceed the Tier 1 PCLs were either excavated or were used to calculate the 95% UCL, not exceeding the Tier 1 PCL. AOC-75 passes the Ecological Exclusion Criteria Checklist. A total of 4,480 cubic yards of soil and material were excavated and removed from the site. Confirmation samples were collected from the bottoms and sidewalls to confirm all waste had been removed.

CSSA requests no further action for AOC-75. Based on the information contained in the report, the TCEQ agrees that no further action for AOC-75 is needed. CSSA currently has approximately 88 on-site and off-site groundwater monitoring wells monitoring two chlorinated solvent plumes which originated from two sources not related to AOC 75.

Questions concerning this letter should be directed to my attention at 512.239-2572. Thank you for your continued cooperation.

Sincerely,

A handwritten signature in black ink, appearing to read "Kirk Coulter".

Kirk Coulter, P.G., Project Manager  
VCP-CA Section  
Remediation Division
