**RL74/83 GROUNDWATER MODELING MEETING
AGENDA**

9:30 a.m., August 10, 1999

This Page Intentionally Left Blank

CSSA Ground Water Modeling Meeting Agenda
August 10, 1999

- I) Overview of CSSA ground water information (to include latest analytical results, average CSSA water usage data, locations of off-site wells, area faulting, geology, etc, info on identified source areas).
- II) Background Chemistry – Formation Residence Time vs. Impressed Ground-Water Characteristics.
- III) Rainfall vs. Water Table Fluctuations
- IV) Review proposed monitoring well locations and completion strategies. (Have 4 cluster wells and 3 regular MWs to consider).
- V) Review Placement of transducers (4 new)
- VI) Identify data gaps and model needs (nice to haves vs. must haves).
- VII) Discuss pros and cons of various modeling packages.
- VIII) Identify preferred modeling strategy.

Meeting Sign-In Sheet

Date:	8/17/1999
Time:	9:30 am
Place:	CSSA
Project:	RL74 and RL83
Contractor:	Parsons Engineering Science
Contract No.:	F11623-94-D0024

Name	Organization	Base/Location	Phone No.	Fax No.	E-Mail
Jo Jean Mullen	AFCEE/ERD	Brooks	(210) 536-5940	(210) 536-9026	JoJean.Mullen@hqsafccc.brooks.af.mil
