

MONITORING WELL LOG

CAMP STANLEY STORAGE ACTIVITY

SITE LOCATION: AOC 65		BORING NUMBER: AOC65-MW04	
CLIENT: CAMP STANLEY STORAGE ACTIVITY		CONTRACTOR: PARSONS ENGINEERING SCIENCE, INC.	
PROJECT: D05084		DRILLING CONTRACTOR: JEDI	
LOGGED BY: MELISSA NUGENT		REF. LOGBOOK: 738290.02	
WELL DEPTH (ft-BGL): 35		DRILLER: ERIC JONES	
GROUND ELEVATION (ft-MSL):		DRILLING RIG: MOBILE B-61	
EAST COORDINATE:		DRILLING METHOD: AIR CORE	
NORTH COORDINATE:		SAMPLING METHOD: SPLIT SPOON	
BEGIN DRILLING: 03/26/01		END DRILLING: 03/26/01	

MONITORING WELL LOG				CAMP STANLEY STORAGE ACTIVITY			
SITE LOCATION: AOC 65				BORING NUMBER: AOC65-MW04			
CLIENT: CAMP STANLEY STORAGE ACTIVITY				CONTRACTOR: PARSONS ENGINEERING SCIENCE, INC.			
PROJECT: D05084				DRILLING CONTRACTOR: JEDI			
LOGGED BY: MELISSA NUGENT				REF. LOGBOOK: 738290.02			
WELL DEPTH (ft-BGL): 35				DRILLER: ERIC JONES			
GROUND ELEVATION (ft-MSL):				DRILLING RIG: MOBILE B-61			
EAST COORDINATE:				DRILLING METHOD: AIR CORE			
NORTH COORDINATE:				SAMPLING METHOD: SPLIT SPOON			
BEGIN DRILLING: 03/26/01				END DRILLING: 03/26/01			
DEPTH (feet)	SAMPLE RECOVERY	ANALYTICAL SAMPLE	PID (ppm)	LITHOLOGIC DESCRIPTION	USGS GRAPHIC LOG	WELL DIAGRAM	
5/5			0	WEATHERED LIMESTONE, 5Y 8/3, pale yellow, clayey, somewhat soft, gradational contact over 15.5-15.7'. LIMESTONE, 5Y 8/1, white, hard, less weathered, some iron oxide staining at 19'. Note: 17-17.3' probable fractured zone, some iron staining and rock is all fractured from core.		20 Driller notes that 22.5-24' was soft, probable loss of core over this interval	
20			WEATHERED LIMESTONE, 5Y 8/3, pale yellow, slightly plastic, some clay.				
3.4/5			0	LIMESTONE, 5Y 8/3, pale yellow, competent, weakly laminated, small vugs (up to ~1cm), dry, no fossils.			
25				WEATHERED LIMESTONE, 5Y 7/4, pale yellow, highly weathered, clayey, slightly moist, soft, non-plastic, no fossils. LIMESTONE, 5Y 8/2, pale yellow, hard, massive, few fossils, dry.			
5/5			0	LIMESTONE, abrupt contact, GLEY 1/5/N, gray, brittle, laminated with thin white beds every ~.5-2".			
				LIMESTONE, GLEY 1/8/1, white, hard, massive, few fossils, coral tubes ~.5" long.
