U-049-17

SUBJECT: Sampling of Water Well I10-10, Located at 24164 IH-10 West

[REDACTED]

[REDACTED]

San Antonio, TX 78257

Dear [REDACTED]

Camp Stanley Storage Activity (CSSA) collected groundwater samples from your well (I10-10) on 6/7/17. These samples were submitted to a laboratory contracted by CSSA's environmental contractor for volatile organic compound (VOC) analysis. This letter provides you with the VOC data from the laboratory results and a formal thank you for your assistance in this groundwater monitoring effort.

Based on the analytical data, no VOCs related to CSSA's groundwater investigation were identified in the water samples from your well. Results from the laboratory analysis are provided as an attachment for the above sampling event.

As part of the ongoing CSSA environmental program, we are continuing to investigate and cleanup VOC source areas on the installation and to track these compounds in groundwater on- and off-post. As part of this effort, your well is scheduled to be sampled again in September 2018.

Again, we would like to thank you for your cooperation. We remain committed to making sure your water is safe to use and keeping you informed. If you have any questions concerning this letter, please contact Felicia Krintz, Environmental Program Manager, at (210) 295-7067.

Sincerely,

  
Jason D. Shirley  
Installation Manager

**Qualifiers for laboratory data report:**

U - The analyte was analyzed for, but not detected. The associated numerical value is at or below the MDL.

F - Indicates the value is above the laboratory method detection limit, but below the laboratory reporting limit for the compound.

**Abbreviations:**

MDL – method detection limit

RL – reporting limit

DCE – Dichloroethene

TCE – Trichloroethene

PCE – Tetrachloroethene

FD – field duplicate
