

DEPARTMENT OF THE ARMY  
CAMP STANLEY STORAGE ACTIVITY  
25800 RALPH FAIR ROAD, BOERNE, TX 78015-4800

April 30, 2021

U-024-21

SUBJECT: Sampling of Water Well LS-5, Located at 7655 Curres Creek Road

[REDACTED]  
7579 Curres Creek Road  
Boerne, TX 78015-6501  
[REDACTED]

Camp Stanley Storage Activity (CSSA) collected groundwater samples from the above listed well (LS-5) on 3/1/21 and 4/5/21. These samples were submitted to a laboratory contracted by CSSA's environmental contractor for volatile organic compound (VOC) analysis. This letter provides you with the VOC data from the laboratory results and a formal thank you for your assistance in this groundwater monitoring effort.

An abbreviated summary of analytical results compared to maximum contaminant levels (MCLs) allowed in drinking water by the U.S. EPA under the Safe Drinking Water Act is provided below:

Date Sampled	VOC Compound	Result (ppb)	MCL (ppb)
Well LS-5**, located at 7655 Curres Creek Road			
3/1/21	Tetrachloroethene (PCE)	1.01F*	5
	Trichloroethene (TCE)	3.99	5
	cis-1,2-Dichloroethene (DCE)	<0.07 (non-detect)	70

\*The "F" qualifier indicates the value is above the laboratory method detection limit, but below the laboratory reporting limit for the compound.

\*\*Due to reporting requirement updates, the sample IDs listed on the report pages now reflect location, date, and time of sample collection, however, are referred by location only within summary tables.

Based on the analytical data, levels of the VOCs PCE and TCE was identified in the water sample from your well before granular activated carbon (GAC) filtration. Results from the laboratory analysis are provided as an attachment for the above sampling event. This level is below the applicable MCL and does not affect usability of your well. The concentrations reported for the VOC TCE exceeded 90% of the MCL in the past; therefore, a filtration system was installed on your well.

Evoqua Water Technologies of Houston, Texas provides maintenance for the GAC filtration system on your well. The system will remain in operation for the foreseeable future or until significant reductions in contamination levels are seen in the water in your well before it enters the filtration system. As we discussed at the time of installation, CSSA will continue to be responsible for all costs associated with operation and maintenance of this system. CSSA will continue to send a representative every three weeks to exchange the five-micron pre- and post-filters in the system.

Evoqua exchanged the first carbon canister and performed other routine maintenance on your system April 1, 2021. If you experience any problems with the system, please let the installer or CSSA know immediately. Evoqua is very responsive and can make additional maintenance visits if needed.

On 3/1/21, CSSA collected a sample from well LS-5 after the water was processed through the granular activated carbon (GAC) filter system. Additional samples were collected 4/5/21 after Evoqua performed the carbon exchange service on 4/1/21. These samples are representative of the water being delivered to you for daily use. Based on the analytical data, no VOCs related to CSSA's groundwater investigation were identified in the samples after the second carbon canister (A2). A summary of the post-GAC analytical results is provided below. Copies of the laboratory data sheets are attached. CSSA will collect additional confirmation samples on a 6-month basis to confirm the system remains effective.

<b>Date Sample</b>	<b>VOC compound</b>	<b>Result (ppb)</b>	<b>MCL (ppb)</b>
LS-5-A2, located at 7655 Curres Creek Road			
3/1/21	PCE	<0.06 (non-detect)	5
	TCE	<0.05 (non-detect)	5
	<i>cis</i> -1,2-DCE	<0.07 (non-detect)	70
LS-5-A2, located at 7655 Curres Creek Road			
4/5/21	PCE	<0.06 (non-detect)	5
	TCE	<0.05 (non-detect)	5
	<i>cis</i> -1,2-DCE	<0.07 (non-detect)	70
LS-5-A2, field duplicate			
4/5/21	PCE	<0.06 (non-detect)	5
	TCE	<0.05 (non-detect)	5
	<i>cis</i> -1,2-DCE	<0.07 (non-detect)	70

As part of the ongoing CSSA environmental program, we are continuing to investigate and cleanup VOC source areas on the installation and to track these compounds in groundwater on- and off-post. As part of this effort, your well is scheduled to be sampled again in June 2021.

Again, we would like to thank you for your cooperation. We regret that your well has been impacted but remain committed to making sure your water is safe to use and keeping you informed. If you have any questions concerning this letter, please contact Margarita Loya, Environmental Program Manager, at (210) 295-7067.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Glenn Moore".

T. Glenn Moore
