Boerne, TX 78015-4800

Re: Approval - Release Investigation Report for Solid Waste Management Unit  
(SWMU) No. 28, dated August 2011  
Camp Stanley Storage Activity (CSSA), Boerne, TX  
TCEQ SWR No. 69026; RN 100662840; CN 602728206;  
EPA ID No. TX2210020739

Dear Mr. Shirley:

The Texas Commission on Environmental Quality (TCEQ) has completed the review of the above mentioned report. SWMU No. 28 is approximately 1.3 acres in size, consisting of two waste disposal trenches containing buried munitions, various metal ammunition parts, and fragments of metal to a depth of 5 feet and exposed at the surface. The waste and impacted soil in the trenches were excavated and removed, and confirmation samples were taken. Further confirmation sampling was conducted on February 24, 2011, following additional excavation for barium.

Based on the final confirmation sampling, no metals were detected above their respective PCLs or background concentrations when used as the PCLs, except for one sample having a concentration of 490 mg/kg for barium. CSSA requests no further action for SWMU No. 28. Based on the information contained in the report, the TCEQ accepts the no further action for SWMU No. 28.

CSSA currently has approximately 88 on-site and off-site groundwater monitoring wells monitoring two chlorinated solvent plumes which originated from two sources not related to SWMU No. 28.

Mr. Jason D. Shirley
