Boerne, TX 78015-4800

Re: Approval - Release Investigation Report for Range Management Unit No.4 (RMU-4),
dated October 2013
Camp Stanley Storage Activity (CSSA), Boerne, TX
TCEQ Solid Waste Registration (SWR) No. 69026; RN 100662840; CN 602728206
EPA ID No. TX2210020739

Dear Mr. Shirley:

The Texas Commission on Environmental Quality (TCEQ) has completed the review of the above mentioned report. RMU-3 was a rifle range covering approximately 3.7 acres in size. Approximately 4,000 cubic yards of soil were excavated from the site, and confirmation samples were taken within the footprint of the excavation. Confirmation samples taken at the site were below the Tier 1 PCLs except one sample SS31 (165.78 mg/kg). Based on the 95% upper confidence limit (UCL) of 37.4 mg/kg, no further action is recommended. RMU4 also passes the tier 1 Ecological Exclusion Criteria Checklist.

According to the report, remediation was completed according to the TCEQ guidance: *Determining Which Releases are Subject to TRRP*. CSSA requests a "No Further Action" for RMU-4. On the basis of information contained in the report, the TCEQ accepts the no further action for RMU-4.

CSSA currently has approximately 88 on-site and off-site groundwater monitoring wells to monitor two chlorinated solvent plumes which originated from two sources not related to RMU-4.

Questions concerning this letter should be directed to my attention at 512.239-2572 or via email at kirk.coulter@tceq.texas.gov.

Mr. Shirley
