RE: Amendment of Class V Injection Wells
TCEQ Authorization No. 5X2600645
CN602728206/RN100662840
IHWCA#69026
Camp Stanley Storage Activity
25800 Ralph Fair Rd.
Boerne, TX 78015

Dear Mr. Lawson:

The Underground Injection Control (UIC) staff has completed review of the revision request received on May 5, 2015 from Parsons requesting approval for the injection of potassium permanganate, sodium permanganate, eosin, and fluorescein via 20 converted vapor extraction wells, and 4 newly constructed infiltration galleries. Our consideration of this proposed project has included coordination with the commission's Remediation Division. Based on our review, approval is hereby given for the operation of the wells according to the submitted plans and specifications for this site.

In order to maintain authorization by rule for the injection operations, the project must meet all requirements set by the Remediation Division and the UIC rules provided by 30 Texas Administrative Code (TAC) Chapter 331. Requirements for the authorization include:

1. All injection wells and/or galleries are to be constructed to meet the standards provided in 30 TAC §331.132 or as approved otherwise and as built construction diagrams are to be submitted to the UIC Permits Section, Radioactive Materials Division, at mail code MC233 within 30 days of completion.
2. Operational and status changes shall be reported to and approved by the UIC Permits Section.
3. Closure (plugging) of injection wells shall comply with standards provided in 30 TAC §331.133. Closure reports including injection well monitoring data (injection volumes, pressures, and results) and plugging reports shall be submitted to the UIC Permits Section, Radioactive Materials Division, at mail code MC233 within 60 days of conclusion of injection activities.
4. Status reports shall be submitted to the UIC Permits Section, Radioactive Materials

Mr. Kirk Lawson

Division, at mail code MC233 upon completion of the injection event and thereafter on a semiannual basis from the date of this letter. These shall consist of a report of the injection activities and the status of the activities over the past six months.

If you have any questions or comments regarding this matter please contact me at timothy.harlow@tceq.texas.gov or (512) 239-3150. If you will be responding by letter, please include mail code MC233 in the mailing address.

Sincerely,

Timothy Harlow, Project Manager
Underground Injection Control Permits Section
Radioactive Materials Division
Texas Commission on Environmental Quality
