Re: Solid Waste Registration Number 69026

Dear Mr. Starnes:

In response to your letter dated August 5, 1987 and a telephone conversation with Cheryl Wilson, the Texas Water Commission (TWC) would like to provide you with additional assistance in making a hazardous waste determination.

A hazardous waste determination must address all of the aspects of the definition of hazardous waste. This includes certain waste mixtures and wastes derived from storage, processing, or disposal of certain hazardous wastes as well as wastes listed in Subpart D of 40 CFR Part 261 ("listed" wastes) and wastes exhibiting a characteristic of hazardous waste identified in Subpart C of 40 CFR Part 261.

If a waste is hazardous (listed in Subpart D or meets a characteristic of Subpart C) there will exist a hazardous waste number for the waste. The hazardous waste numbers can be found in the various paragraphs of 40 CFR Part 261 which define hazardous waste characteristics and list descriptions. We encourage each hazardous waste generator to determine the appropriate hazardous waste number and include that number when reporting the generation and management of that waste to the TWC.

Enclosed for your convenience is a copy of the information each generator is required to submit to the TWC under 31 Texas Administrative Code Section 335.6.

Mr. Jerry Starnes
