ft-BTOC

= feet below top of casing

ft-MSL

= feet above mean sea level

* = wells in which additional surface casing was added

NA = Wells 10 and 11 were measured via air-line; depths were not measured; or groundwater elevations were not calculated.

Note: In well H, measuring equipment is obstructed at about 20 feet BTOC.

December 1995 values for wells 9, 10, and 11 may not represent true water level due to disturbance prior to measurement.
