Number of wells screened in each formation.				21	4	6	
Average groundwater elevation in each formation given in feet.				1143.98	1148.26	1133.11	
Notes:							
Average formation groundwater elevations are calculated from measurements in wells screened in only one formation.							
CS-1, CS-9, CS-10, and CS-11 are open boreholes across the LGR, BS, and CC formations and are not included in average groundwater elevation calculations. These wells are current and former drinking water wells.							
Wells CS-2 and CS-4 are open boreholes across more than one formation and are not included in average water level calculations.							
CS-I was not measured due to technical malfunction.							
?=Exact screening information unknown for this well.
