Number of wells screened in each formation.				18	3	5	
Average water level in each formation given in feet.				1130.87	1129.21	1098.34	
Notes:							
CS-1, CS-9, CS-10, and CS-11 are open boreholes across all formations and are not included in average water level calculations. These wells are current and former drinking water wells.							
Average formation water levels are calculated from measurements in wells screened in only one formation.							
? = Exact screening information unknown for this well.
