Average groundwater elevation change (feet)			-8.47			
Average groundwater elevation change in each formation (feet)				-8.03	-7.74	-10.16
Notes:						
Average groundwater elevation change is calculated from wells screened in only one formation.						
CS-1, CS-9, CS-10, and CS-11 are open boreholes across the LGR, BS, and CC formations and are not included in average groundwater elevation calculations. These wells are current and former drinking water wells.						
Wells CS-2 and CS-4 are open boreholes across more than one formation and are not included in average water level calculations.						
NS = Not surveyed yet, NA = Data not available						
?=Exact screening information unknown for this well.						
CS-I was not measured in December 2002 due to technical malfunction.
