Notes:
 UTM: Universal Transverse Mercator. Coordinates outside of CSSA are estimated by placement on a georeferenced map.
 MSL: Mean Sea Level
 bgs: Below Ground Surface
 N/A: Data Not Available
 * Where denoted, the estimated water source is based upon those codes present in the TWDB database. For other wells, the water-bearing unit has been estimated based upon drilling reports or estimates based upon relative completion depth.

Bolded Well Locations are located within the 1/4-mile primary survey outside the CSSA boundary.

Italicized Locations indicate that no drilling records are available from the TWDB or TNRCC

Underlined Locations indicate key wells located at a distance between 1/4-mile and 1-mile from CSSA. Data collection and exact location were beyond the scope of this survey, therefore information may be incomplete for these wells.

Shaded Locations are Falco Water Company wells outside of 1 mile of the CSSA boundary. Specific construction and location data for these wells were not obtained since these wells are well beyond the scope of the original survey.
